

My signature on this form notes that I have been made aware by my sales representative of the quality issues of the photo(s) I've provided, and that I understand that this will impact the final etching quality during SuperNova International, Inc.'s production process.

I also understand that the color of the die that we supplied will not laser well. The die color does not contrast well with the laser etching process.

I authorize SuperNova International, Inc. to use this image(s) in design and production for my order with this knowledge.

Signed,
